

OSE250
OSE250P

The OSE250 is perfectly suited for intense picking in a tough industrial environment. With the main emphasis on driver productivity, the OSE250 is designed to simplify the entire order picking process. Higher pace and increased performance requirements in goods handling have set the standards for this truck. Cost efficiency together with safety are key words.

- The new E-Man steering concept is ideally suitable for picking activities. Light, one hand operation increases the flexibility for the driver and at the same time simplifies driving in the fork direction.
- The new steering handle can easily be adjusted sideways. This optional feature is excellent when the driver wants to operate the truck while walking along it. Its flexible solution will also help the operator in difficult manoeuvring situations.
- The performance of the OSE250 is first-rate. A travel speed of 12km/h together with high acceleration increases the number of pick-ups. With our motor technology it is very easy to adjust top speed, acceleration and speed reduction to meet with individual requirements.
- Higher demands for productivity means sometimes more volume in each picking cycle. The capacity of the truck is 2500kg which easily facilitates picking in 4 roll containers or 2 pallets.
- The BT Powerdrive system provides reliability and simplicity. Can-bus technology means fewer parts and reliable transmission of data. A Pin code start up procedure offers higher operational safety by stopping unauthorised driving.
